

ARK Hospital

[insert start date here]

We are participating in a national study to improve antibiotic prescribing. We need you to complete a brief educational tool (see below for details) and **review & revise** your antibiotic prescriptions.

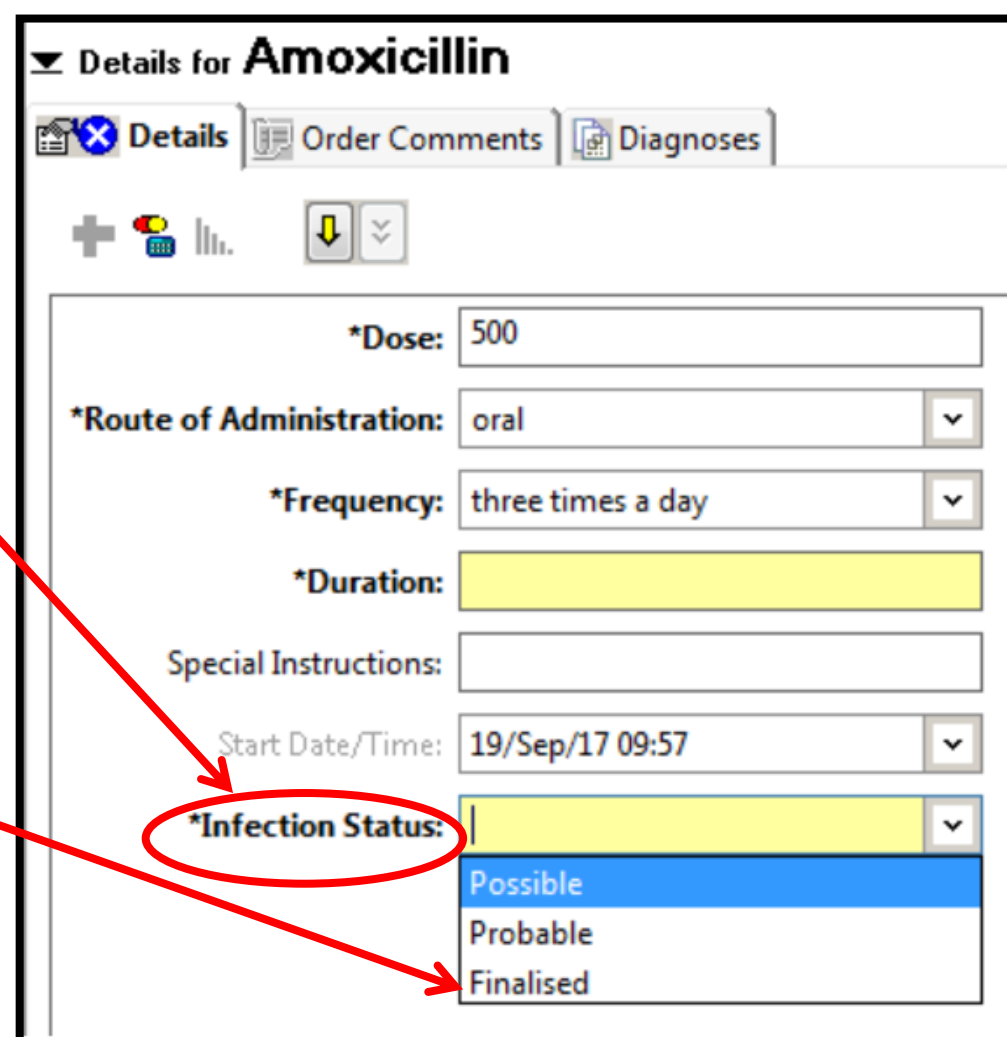

48h into antibiotics? Remember to **review & revise...**

Can the antibiotics be stopped/ narrowed/ switch to PO?

Prescribing an antibiotic?

- Assign an “infection status” of “Possible” or “Probable”
- Only prescribe an initial 48-72h of antibiotics
- **review & revise within 48 hours**
- a “Finalised” antibiotic is prescribed only after results and progress have been reviewed and there is a definitive plan

Details for Amoxicillin

Details | Order Comments | Diagnoses

*Dose: 500

*Route of Administration: oral

*Frequency: three times a day

*Duration:

Special Instructions:
